

PARKSUNNATH RPK

Binghamton, NY • +1 (607) 343-8233 • rpkparks@gmail.com • github.com/parks3131

EDUCATION

Binghamton University, State University of New York

Binghamton, NY

Bachelor of Science in Computer Science

May 2026 • GPA: 3.80 • Dean's List

Relevant Coursework: Machine Learning, Database Systems, Artificial Intelligence, NLP, Data Structures & Algorithms, Theory of Computation, Cloud Computing, Object-Oriented Programming

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++, C, JavaScript, TypeScript, Bash

Data Science & ML: Pandas, NumPy, Scikit-learn, PySpark, TensorFlow/Keras, Hugging Face, OpenCV, feature engineering, model evaluation (precision, recall), AI evals

Data & Analytics: PostgreSQL, pgvector, MongoDB, Redis, Databricks, ETL pipelines, Power BI, Power Query, Excel/Sheets pivot tables, Grafana, InfluxDB

Backend & Automation: Django, FastAPI, Flask, Pydantic, REST APIs, GitHub Actions CI/CD, Docker, AWS (EC2, RDS, S3, Lambda), Linux

AI & Tools: LangChain, RAG, OpenAI APIs, MCP, Git, Jira, Confluence, Jupyter, VS Code, Claude Code, Cursor, Agile/Scrum

PROFESSIONAL EXPERIENCE

QuickSlot Health

Remote

Software Engineering Intern

Sep 2026 – Present

- Work directly with the CTO to build features for a HIPAA-compliant clinical documentation platform for private-practice physicians, running on AWS (EC2, S3, Lambda, VPC).
- Investigate and fix bugs reported through real user feedback; write unit, integration, and functional tests and follow strict data privacy rules for sensitive patient records.

Acarin Inc

Baltimore, MD

Evals and Automation Intern

Jan 2026 – Aug 2026

- Built a real-time telemetry pipeline (Docker, InfluxDB, Grafana) collecting time-series data on p95/p99 latency, error rates, and throughput for an AI-powered HR platform under 20,000 concurrent virtual users.
- Modeled multi-step user journeys with k6 and tracked per-user latency across Keycloak SSO, LLM, and UI stages, turning raw failure data into structured reports that exposed LLM timeouts and permission gaps and guided sprint planning for an 8-person Agile team.
- Automated all manual regression testing with a Playwright + Cucumber BDD suite on GitHub Actions; paired Playwright MCP with Claude Code to auto-patch broken UI selectors, cutting workflow setup from days to hours.

Elevated Lab

Remote

Machine Learning & Computer Vision Intern

May 2025 – Jul 2025

- Trained and validated CNN models (TensorFlow/Keras, MobileNetV2, OpenCV) for restricted-object and face mask detection, reaching 92% precision and 90% recall through careful preprocessing, augmentation, and evaluation.

RESEARCH & PROJECT EXPERIENCE

CitiBike Data Analysis & ETL Pipeline (*Python, SQL, PySpark, Databricks*)

Jan 2025 – Feb 2025

- Built an end-to-end ETL workflow to clean and transform city-scale trip data, with automated validation checks that caught inconsistent records before any modeling.
- Built Databricks dashboards and automated reports surfacing peak demand and usage trends.

AI Candidate-to-Job Matching Platform (*FastAPI, PostgreSQL + pgvector, OpenAI, Docker, AWS*)

- Parsed PDF resumes into structured JSON and ranked 100+ candidates against job descriptions with cosine similarity over 1,536-dimension embeddings; hit sub-500 ms matches using IVFFlat indexing and Redis caching.

Interstellar, Developer Intelligence Platform (*Python, FastAPI, Pydantic, AI Evals*)

2025 – Present

- Built eval pipelines that benchmark LLM output accuracy and regression-test intent detection on every commit, so model changes are validated against known cases before they ship.

ClubChat, Club Coordination App (*solo developer, open source*)

github.com/parks3131/ClubChat-Remastered

- Designed and built solo a full-stack app replacing group chats and spreadsheets for three Binghamton clubs (running, triathlon, swimming) in TestFlight beta: a 39-table PostgreSQL schema, 116 API routes, and 1,800 automated tests.

LEADERSHIP & CERTIFICATIONS

Course Assistant, Data Structures & Algorithms, Binghamton University

Jan 2025 – May 2026

Designed coding problems and test cases; explained technical concepts to students in weekly labs and office hours.

Certifications: Google: Data Analytics • Anthropic: Claude Advanced MCP & AI API Building • University at Buffalo: OpenCV • IIT Bombay: Python, C, C++
